

## **Be Green, Earn Green Promotion and Partnership**

MINNEAPOLIS, MN (Sept. 8, 2015) – Since 1983, NA Trading and Technology has been a dependable supplier for OEM-compatible copier parts and supplies. With over 15 distinguishing brands in the copier industry, NATT is continuously working to expand offerings of OEM compatibles. NATT is proud to announce the release of the remanufactured Canon GPR-30/31 Universal Drum Unit.

NATT is looking to partner with dealerships in providing universal drum units for the GPR-30/31 applications along with receiving used drum cores in return. With your commitment to recycling these cores through us, we will be able to provide the rebuilt GPR-30/GPR-31 drum units to fit the following models: IRAC5030, IRAC5035, IRAC5045, IRAC5051, IRAC5235, IRAC5240, IRAC5250, IRAC5255.

By partnering with us, not only will you reduce your environmental impact on e-waste, you will also be rewarded for returning your used GPR-30/31 plastic frame cores. For each plastic core unit received, you will earn \$10.00 in core credit. If the metal backing frame cores are returned instead, a \$5.00 core disposal fee will be charged per unit received.

The products eligible for core credit include: 2776B004AA, 2777B004AA, 2778B004AA, 2779B004AA.

Don't forget, we can make the IRAC5051 segment even more profitable with our feed tires and rollers, fixing film, and waste toner bottles.

NA Trading and Technology continues to search for improvements to their catalog where they could be providing for clients. If you have any product suggestions, please call a Product Specialist at 800-231-8434 or leave [feedback](#) on our website.
